

Care & Maintenance Guide for ARMORTEX®

Thank you for choosing **ARMORTEX® Premium Acrylic Texture Coating** for your property.
Care and maintenance of the product is easy.

Cleaning

Spot cleaning: Spray color- and chlorine-free all-purpose cleaner over soiled spot. Gently scrub with a clean towel or color fast sponge. Rinse off with water and then dry with absorbent lint-free towel.

Difficult spots such as ink, markers, scuffs and lipstick: Spray color- and chlorine-free all-purpose cleaner over soiled spot. Rub with Extra Power Mr. Clean® Magic Eraser®. For very stubborn spots, reapply cleaner and rub vigorously. Wipe area with a clean damp towel.

Touch-Up

Repairs: In the unlikely event of severe damage such as deep scrapes or severe impact, the damaged area can be patched using standard patching materials. The surrounding area should be sanded down flush. The same basecoat and texture finish using **ARMORTEX** material originally applied, should be applied again. For large repairs or patches, a corner to corner application using an airless spray system or hopper will be necessary for finish consistency throughout the room. For small areas, roll on base coat over patch and after dry, tap a loaded paint brush against wrist or other object, to replicate spatter coat. If matching a knockdown finish, wait a few minutes, then knockdown.

Updating the Finish: After years of wear, it may be desirable to freshen the texture finish, particularly in high traffic areas. **ARMORTEX** can be topcoated with **ARMORSHIELD®**. The **ARMORSHIELD** coating is formulated using the same extremely durable acrylic resin as **ARMORTEX** and it will dry to a rock-hard scrubbable finish.

Precautions

- Do not use a cleaning solution that is colored or has dyes. Only use clear cleaners.
- Do not use bleach on the surface.
- Do not attempt to touch up walls with a paint product by having the color matched. There will be a difference in the finish. *If touch up is needed, use **ARMORTEX** from original tinted batch or have **ARMORTEX** matched to original color.*
